Dear Ms. Spurr:

I am requesting that my name be added to Hans Laetz' letter of comment respect to the Broad Beach project, that is currently being vetted by the agencies.

Mr. Laetz's letter clearly reflects our concerns regarding the project's difficulties and negative impacts as to the ambience of our life here in Malibu.

The nature of the work had a detrimental effect on our family life when done here last. Everything from sleeping habits, logistics. Air quality.

My health deteriorated as results the construction.

Respect was not granted to us in the way of advance notice of what was happening on the outside.

We had no intelligence on the project. We had no way to possibly prepare for the horrendous displacement we went through, including the length of time the construction went on for.

The lack of concern shown for the people who are heteronymous to this project is appalling.

Respectfully
Sheila Becker
